

METALLIC Laminate Pricing - 1.

Most Metallics are scratched when we receive the material - even those that have protective coating.

We can not machine Laminex Brushed Stainless Steel or Wilsonart Stainless Steel. Our machinery is woodworking not metal. The cutters on our machines will be damaged.

The pricing of Metallic Laminates is based on a calculation which reflects the extra cost of the material, the extra labour for the pre-sanding of individual slats and the extra labour for the care & attention that is required.

Ask the Brand and Description, then locate in the following pages and note comments in the 3 right hand columns.

If **'Not suitable for shutter'** is noted - inform client.

If **"Horizontal Flutes Only"** is noted - means can't do Vertical flutes.

If **'Client must supply material'** is noted - inform client - cost is MDF MR plus 18% including Road Freight from branch.

If there is a surcharge %age in the right hand column, check if post formed handle is available - if not inform client.

To calculate price ADD the surcharge percentage shown to normal **LAMINATE** Price from Price List.

The only extra is for Vertical Brushing @ 15% surcharge.
