Cabinet hardware solutions since 1976

L&S

We help make
your projects
shine

L&S were born in Italy in 1977 to meet the needs of the furniture sector and have quickly become a leader on an international level. Thanks to the high quality level of production activities and constant investments in technological research, L&S have expanded their presence to now operate in more than 50 countries.

L&S

L&S design integrated lighting systems

Indoor Lighting Solutions

- Lights can be integrated into furniture: linear lights, spots, light panels, sanitising lights.
- Ceiling and wall fixtures with integrated sound-absorbing panels.
- Aesthetic architectural lights

Integrated Solutions

- Can be used without the need to “couple” them to third party products: illuminated mirrors and electrified modular structures to compose and furnish walls in living rooms, shops, offices, bars or entire walk-in closets with a single solution

Control Systems

- Power systems and related accessories. The complements needed to enhance the use of light
- Remote control: Wi-Fi, zBluetooth, Alexa and Google Home, voice control, radio controls, wire or battery sensors

Lighting Planning

- As a support to define the most effective solution for the end use

Our story

Founded in 1976, Wilson & Bradley is a family-owned business renowned for supplying premium kitchen and cabinetry hardware in Australia, coupled with exceptional customer service.

For over 40 years, the company has grown to become an industry leader, catering to a wide range of clients including large manufacturers, architects, interior designers and homeowners.

Wilson & Bradley's success is rooted in its family values, emphasising personalised service, reliability, and a deep understanding of customer needs. This ethos is evident in everything we do, from selecting diverse, high-quality products to maintaining strong relationships with leading manufacturers, ensuring a steady supply of innovative items.

Wilson & Bradley stay ahead of market trends, continuously updating our products to remain relevant. Our robust distribution network across Australia reflects our dedication to fulfilling our promise of quality and service to every customer.

Contents

8. Introduction

10. Lighting Selection Process

15. L&S MEC System

19. LED Strip Lighting

34. LED Downlights

L&S customised lighting solutions

Light can create ambience and warm up a room. Lighting is a vital element, capable of enhancing the experience of a room or piece of furniture.

L&S Lighting consists of top of the line LED Strip Lighting, available in many styles and colours to suit any space. Commonly used for accent lighting of kitchens, shelving,

stairs and many other locations throughout the home, LED strip lighting can be easily incorporated into the design of an existing kitchen and other rooms in the home.

Also available are the LED Downlights, available in many applications and control options including the L&S Emotion range.

Plug and play

Plug and play LED lights are easy to install and don't require the assistance of a qualified electrician.

You simply need to:

- Choose your desired lighting whether it be LED Strip Lighting or LED Downlights
- Attach to your desired surface
- Plug in and switch on

How to select your lighting system

LED lights are highly adaptable and customisable to fit your precise needs.

Follow the below steps to easily design your lighting system.

1

Space/Function

Choose where and how you would like to use your L&S lighting.

2

Colour

Choose which colour lighting is required:
Warm white, natural white, cool white, emotion or RGB.

3

Lights & Drivers

Select your driver(s) depending on how much power and what kind of control you need for your lighting. Drivers are rated by wattage, the wattage of an LED driver must be greater than the total wattage of the LED lighting connected to it.

4

Control

How do you want to control your lights? L&S have suitable modules for all functionalities

Step 1:
Space/Function

L&S lighting is suitable for use in a range of residential or commercial applications.

Step 2:

Colour

Effect (Warm, Natural, Cool and RGB)

Warm, natural and cool white are measured on a Kelvin scale, represented by the letter 'K'. Kelvin (K) is a measurement used to describe the colour temperature, warmth or coolness of a light source.

Warm white is around 3000K, natural white is around 4000K and cool white is around 6000K.

Warm white is a low colour temperature and has a very warm, yellow and even orangey tone to it. It's very similar colour temperature to the traditional incandescent bulbs.

Natural white has a slight hint of warmth, and provides a nice, clean appearance.

Cool white on the other hand has a high colour temperature and is a very bright, clean, white light.

There are many different advantages in choosing warm, natural or cool white. You should consider the purpose, style and mood of a space to help you choose the perfect colour temperature for you.

ww Warm White

Creates an inviting cosy area. Generally used in rooms where everyone gathers to visit or relax.

nw Neutral or Natural Light

Creates a natural daylight effect. It mimics natural light and can be comfortably used anywhere in the home.

cw Cool White

Complements contemporary and modern styles casting a bright, fresh glow. Cool white is great for task lighting as it is a brighter, more focused light.

RGB RGB

Perfect for either highlighting or accenting areas, RGB strip lighting is energy efficient and gives you the ability to change the colour of a room at the touch of a button.

Step 3: Lights/Driver

How many lights do you want to connect?

With the launch of the new L&S MEC Driver, L&S has many options to power as many or as little lights as possible from the 1 driver!

The MEC system is a brand new driver that boasts flexibility and ease of use like never before. It is easy to install, control and transform your space.

The heart of the system is the new multi-voltage power source, available in five different levels of wattage and suitable for 24V applications. Power as many or as little lights as you require from the 1 driver with multiple control capabilities.

Modules can be coupled to power multiple lights where needed.

What size driver do you require?

It is best to outline your whole project to see how many metres of strip or total amount of downlights you will be using in total. Each driver has a maximum load capacity given in watts.

The length of strip lights or number of downlights you can connect to a single driver is dependent upon the maximum load of the driver.

Driver selection is based upon desired length, amount of lights, chosen colour and brightness required.

Step 4:
Control

How do you want to control
your lights?

The L&S MEC Driver range has suitable driver systems and distribution modules for many control uses. Including the following:

Standard Control

Turn the lights on and off via a switch

Sensor Control

Turn the lights on and off via a sensor that detects movement

Remote Control

Turn the lights on and off and change the brightness and colour directly from the remote control

Smartphone Control

Control the lights with an app installed on any smartphone

Touch Control

Turn the lights on and off and adjust brightness via touch

Voice Control

Can be integrated with Google Home or Amazon Alexa. This allows total control of your lights via voice

Smarter TECHNOLOGY Easier INSTALLATION Better EXPERIENCE

The next evolution in lighting from L&S, exclusive to Wilson & Bradley, is the all new MEC driver system.

The heart of the system is the new multi-voltage power source, available in five different levels of wattage and suitable for 24V applications.

The MEC system makes it much easier to connect your lighting to a multitude of applications.

MEC System Configurations

Standard Configuration

Standard & Wired Sensor Modules

- The Standard Configuration incorporates our standard and wired sensor modules.
- The simple way to connect your lights – use the distribution modules plugged into the MEC driver to connect up to 8 lights.
- These modules can also be coupled together to power more lights and cater to more applications.

Smart Configuration

Smart & Bluesmart Module

- The Smart Configuration incorporates our Smart and Bluesmart modules
- The smart way to connect your lights – use the smart distribution modules plugged into the MEC driver to connect up to 8 lights to be controlled remotely through the suggested wireless controllers, wireless sensors, voice commands or directly from your smartphone with the Bluesmart app.
- Choose one of the modules to control the lights via smart controllers, sensors, smartphone or smart device such as Amazon Alexa or Google Home.
- These modules can also be coupled together to power more lights and cater to more applications

LED Strip Lighting

Perfect for use in both residential and commercial applications, LED strip lighting is an extremely innovative and functional way to add an extra touch of elegance to any space.

Commonly used for accent lighting of kitchens, shelving, stairs and many other locations throughout the home, LED strip lighting can be easily incorporated into the design of an existing kitchen and other rooms in the home.

L&S LED 24V strip lighting is available in many configurations, including the industry best Flexible Strip Reel, Silicone Flexible Strip Lighting the Mini Octopus, and also our brand new RGB Flexible Strip Lighting.

Plug and play

Plug and play strip lights are easy to install and don't require the assistance of a qualified electrician.

You simply need to:

- Cut the strip to the length required
- Attach to your desired profile or surface
- Plug in and switch on

What are flexible LED strip lights?

A Flexible LED Strip Light is a flexible circuit board that is populated with LEDs. It has a strong adhesive backing and can easily be stuck to most surfaces.

The strip can be utilised almost anywhere in order to add powerful lighting in a variety of colours and brightnesses.

Benefits of strip lighting

- Easy installation
- Energy efficient
- Flexible
- Non-toxic
- Durable
- Cost effective
- Environmentally friendly
- Low temperature
- Variety of uses
- Design appeal

Product details

- 24V plug and play system for tool less connection
- High efficiency flexible strip LED
- Supplied in 5m and 20m rolls
- Input cable (strip connector) included with 5 metre rolls
- Supplied with double sided tape for easy assembly
- Strips can be cut at a predefined length of 39, 83 and 100mm
- Accessories available to allow dimming, remote control, motion sensors and touch systems

Features

Cut to length

Most strips can be cut every few inches, meaning that you can easily customise the strip to fit your space.

Low Profile

Most strips have a thickness of 2mm so they may be installed in tight spaces and can easily be hidden from view.

Peel & Stick

The back of the strip is fitted with a strong 3M brand adhesive tape, allowing you to peel and stick lights to many different surfaces.

Flexible

You aren't limited to lighting flat spaces. LED strips are flexible and can be bent vertically.

Colour Options

Select from a variety of colours including warm white (3000K), natural light (4000K), cool white (6000K), RGB & Emotion (3000-6500K).

Customisable

We are able to offer many different strip reels, whether it be in different brightnesses, sizes, control abilities or profiles. There is bound to be one to suit your space.

LED Strip Lighting

MEC Profiles

Introducing our latest range of L&S LED Strip Lighting Profiles, designed to enhance any space with versatile lighting solutions. This collection includes profiles suited for recessed, surface-mounted, and angled installations, providing options for a wide variety of applications.

MEC 1

Surface-mounted profile

MEC 2

Recessed profile

MEC 4

Recessed angled profile

MEC 5

Surface-mounted angled profile

Whether you need sleek recessed lighting or stylish surface-mounted options, this new range is the perfect fit for modern interiors.

MEC 1:

Surface-mounted profile

The MEC 1 is a versatile surface-mounted profile system designed to perfectly complement L&S Flexible Strip Lighting with direct light dissipation. Ideal for modern lighting setups, it combines functionality with a sleek, professional appearance.

Key Features

- Can be cut to size for a perfect fit.
- Available in convenient 1.5m profile lengths and 3m diffuser lengths
- Stylish aluminium finish
- Retrofittable

Specifications

- Length: 1500mm (can be cut to size)
- Height: 11mm
- Width: 16mm

Included in kit

- 1 x profile, 1 x diffuser, 1 x pair end caps,
- 1 pack of mounting brackets and screws

MEC 2:

Rebated profile

The MEC 2 is a versatile rebated profile system designed to perfectly complement L&S LED Strip Lighting with direct light dissipation. Ideal for contemporary lighting setups, it combines functionality with a sleek, professional appearance.

Key Features

- Can be cut to size for a perfect fit
- Available in convenient 1.5m profile lengths and 3m diffuser lengths
- Stylish aluminium finish
- Retrofittable

Frosted Diffuser

Mini Octopus Flexible Strip Reel

24V

The L&S Mini Octopus is a unique flexible silicone LED reel that combines style with functionality.

Its slim and flexible profile allows for unique designs such as curving along panel faces or edges, making it ideal for architectural highlights, ambient lighting and decorative touches. The cut-to-size functionality makes installation incredibly simple. Trim the strip to your desired length and insert it into the specified rebate to achieve a polished, professional look with minimal effort.

With IP67-rated protection, it's also perfect for damp areas like bathrooms. Available in Natural White (4000K), Warm White (3000K) and Emotion Dual Colour (3000K-4000K).

Features

- High luminous efficiency
- To suit 24-volt accessories
- Two pre-attached input cables on each end of the reel
- Co-extrusion moulding technology
- High light transmittance
- Max 30mm bending radius
- Food-grade environmental silicone

- Unique optical and uniform light distribution with no shadow
- Sideview LED providing good flexibility
- Allows plug and play connections for multiple fixtures

How to install

The Mini Octopus is simple to install without the need for a qualified electrician.

STEP 1:
Rebate

STEP 2
Cut strip to length and fit

STEP 3:
Plug in and switch on

LED Mini Octopus

3mm - New

Discover the latest innovation in the L&S Mini Octopus family – the ultra-sleek 3mm slimline LED silicone strip light. Designed to combine functionality with modern aesthetics, this new addition offers unparalleled versatility for both residential and commercial lighting projects.

Available in Warm White (3000K) for cozy, inviting spaces or Natural White (4000K) for clean, balanced illumination, the slimline Mini Octopus effortlessly complements a variety of settings, from kitchens and bathrooms to retail and hospitality environments.

Thanks to its cut-to-size functionality, customisation is a breeze. Simply trim the strip to your desired length and insert it into the specified rebate for a seamless, professional finish. Its intuitive design ensures a quick and straightforward installation process, saving you time while achieving stunning results.

With its minimalist 3mm profile, this LED strip light is perfect for discreet installations, offering subtle yet impactful lighting that enhances any interior.

Whether you’re looking to highlight architectural details or create ambient illumination, the L&S Mini Octopus 3mm Slimline delivers style, simplicity, and superior performance.

LED Mini Octopus

6mm - New

The L&S Mini Octopus family just got even more versatile with the addition of our brand-new 6mm LED silicone strip light. Designed to meet the demands of modern interiors, this innovative option brings a fresh dimension to your lighting projects.

What makes the 6mm Mini Octopus stand out is its unique ability to curve along the edge of the panel, as opposed to the face. This flexibility opens up exciting possibilities for creative applications, whether you're highlighting benchtops, island benches, bedheads, or achieving sleek, straight linear designs.

Engineered with both versatility and aesthetic appeal in mind, this strip light is available in two colour temperatures:

- Warm White (3000K) for a cosy, inviting glow.
- Natural White (4000K) for clean, modern illumination.

The cut-to-size functionality makes installation incredibly simple. Trim the strip to your desired length and insert it into the specified rebate to achieve a polished, professional look with minimal effort.

Perfect for a variety of settings, the 6mm Mini Octopus seamlessly combines style, functionality, and ease of use.

Whether you're designing a contemporary home or a commercial space, this addition to the L&S Mini Octopus range is your go-to solution for striking, customisable lighting.

LED Downlights

Exclusive to Wilson & Bradley, L&S has a wide range of 24V LED lights that are ideal for use in both residential and commercial lighting applications.

LED downlights offer a great lighting solution for any room with either recessed or surface mounted options providing premium concentrated lighting.

The L&S 24V Downlight range also comes with Emotion technology, which allows you to gradually vary the colour temperature from warm white to cool white.

The L&S LED Emotion lighting range is the next level in LED technology. The LEDs in the Emotion range come with variable colour technology, which is the ability to change the light contrast from cool to warm.

The emotion lights can be used in a variety of ways. They can be used in unison with the standard driver, by using the Emotion remote, or with the brand new MEC System by using the Smart modules.

The Smart modules allow for extra capabilities in wireless remotes and touch switches, such as temperature and brightness changing.

Available ranges

Standard

The L&S Standard LED lighting range includes a range of lighting solutions suitable for use in a variety of applications. LED downlights offer a great lighting solution for any room, with a recessed fitting in your ceiling that provides concentrated lighting.

Key Features

- Lights can be recessed or surface mounted
- Available in both cool and warm white options
- Available in a range of wattages
- Available in a range of finishes including white, black and nickel

Emotion

The L&S LED Emotion technology allows you to gradually vary the colour temperature from warm white to cool white. All emotion lights must be used in conjunction with Emotion Remotes and Touch Switches, or under the MEC System, you can control Emotion colour changing through your smartphone or voice capabilities

Key Features

- Allows lights to be adjusted from warm white to cool white
- Suitable for under-cabinet and under-shelf applications and for mounting inside cabinets
- Available in a range of finishes including white, black, nickel and chrome

Sunny LS

24V

The Sunny LS Round is one of our most popular fixtures that uses an innovative lens technology. The spotlight is very low profile which makes installation very simple without the need to drill large holes into the cabinets.

Key Features

- Recessed or surface mounted
- Clear lens
- Available in Cool White (6000K) and Warm White (3000K)
- Available in white, nickel and black finishes
- Energy efficient using 1.5W 15 LED's

Sunny LS

Colour	Finish	Diameter	Wattage	Code
Cool White (6000K)	Black	64mm	1.5	LSSUNC24B
Cool White (6000K)	Nickel	64mm	1.5	LSSUNC24N
Cool White (6000K)	White	64mm	1.5	LSSUNC24W
Warm White (3000K)	Black	64mm	1.5	LSSUNW24B
Warm White (3000K)	Nickel	64mm	1.5	LSSUNW24N
Warm White (3000K)	White	64mm	1.5	LSSUNW24W

Emotion Downlights

Nova

24V

The Nova Emotion is a highly efficient, recessed spotlight with clear lens, using 2.7W of energy. The Emotion technology allows you to choose variable colour temperatures from warm white to cool white.

Key Features

- Extra slim recessed lighting
- Installation depth of 13mm
- Clear lens optics for maximum light efficiency
- 39 LEDs

Sunny C

Colour	Finish	LED's	Diameter	Wattage	Code
Emotion (3000K - 6000K)	Chrome	30 + 30	75mm	2.5	LSNVAE24C
Emotion (3000K - 6000K)	Nickel	30 + 30	75mm	2.5	LSNVAE24N

Emotion Downlights

Nube

24V

The Nube Emotion is a recessed aluminium downlight with opal polycarbonate diffuser. Offered in two different sizes and three finishes, it can be installed flush or in support by means of the special spacer accessory (not included)

Key Features

- Very slim – sits almost flush once installed
- Frosted diffuser
- Available in 24V
- Each light allows for warm white, natural white or emotion contrast switching
- For under-cabinet applications and mounting inside cabinets
- Conversion cable included to switch lighting from either warm white or natural white
- Available in sizes 35mm and 58mm
- Available in white, black or nickel finish

Nube

Colour	Finish	Diameter	Wattage	Code
